2 Introduction

2.1 Background

- 2.1.1 The Cabinet Committee on Economic Affairs, in its meeting held on February 3, 2016, decided that the allocation of coal linkages/ letter of assurances for the non-regulated sector shall henceforth be done through an auction based mechanism.
- 2.1.2 Subsequently, the MoC issued a letter to CIL and SCCL vide letter no. 23011/51/2015-CPD(Pt-I) dated February 15, 2016 (the “**Policy**”), for auction of coal-linkages for the non-regulated sector, where sub-sectors could be cement, sponge iron/ steel, aluminium and others (excluding fertilizer (urea) sector) including their CPPs, through a competitive bidding process. According to the Policy, the auctions are to be conducted by CIL/ SCCL and CIL has been entrusted with the task of working out the detailed procedure/ methodology for conducting the auction process. CIL/ SCCL have also been instructed to take immediate necessary action for conducting the auctions.
- 2.1.3 Accordingly, CIL has *inter alia* decided to auction coal linkages for the various sub-sectors within the non-regulated sector except fertilizer (urea) (“**Tranche VI Coal Linkage Auction**”).
- 2.1.4 This Scheme Document is being issued by CIL for auction of coal linkages with respect to the cement sub-sector .

2.2 The Policy

Bidders are encouraged to familiarize themselves with the Policy. As of the date of this Scheme Document, the Policy is available at http://coal.nic.in/sites/upload_files/coal/files/curentnotices/150216.pdf.

2.3 The Coal Linkages

The coal linkages from each Lot identified in *Annexure VI* (“**Coal Linkages**”) are being auctioned strictly for consumption by the Specified End Use Plant (“**Specified End Use**”).

Any swapping and/or rationalization of the Allocated Quantity shall be in accordance with extant applicable policy.

The modalities of linkages from cost plus sources is guided by Schedule-2 of this document.

3 Auction Process

3.1 Electronic Auction

- 3.1.1 The auction of the Coal Linkages shall be conducted on the electronic platform created by the Service Provider (“**Electronic Platform**”) and no physical Bids shall be accepted or considered. The interested bidders are required to seek registration on the Electronic Platform for bidding purposes against payment of a non-refundable registration fee of Rs. 10,000 (Indian Rupees Ten Thousand) plus applicable taxes. Bidders already registered

for the coal linkage auctions of either CIL and/ or SCCL must necessarily use the same registration for the same Specified End Use Plant and should not register again.

3.1.2 The technical details and other information with respect to access to the Electronic Platform and bidding thereon are provided in *Annexure V*.

3.1.3 In case of any technical clarification regarding access to the Electronic Platform or conduct of the auction process, the Bidders may contact the Service Provider directly at the contact details provided in *Annexure V*.

3.2 Scheme Document

The Bidders shall be eligible to download the Scheme Document from website of the Service Provider free of cost.

3.3 Normative Coal Requirement

3.3.1 The Normative Coal Requirement for each Specified End Use Plant shall be calculated as follows:

$$\text{Normative Coal Requirement (MTPA)} = \text{Normative Energy Requirement (kcal per annum)] divided by [(10}^9\text{) multiplied by (the average gross calorific value of a particular grade of coal as specified in Annexure VII)]}$$

Where

$$\text{Normative Energy Requirement (kcal per annum)} = \text{[Annual energy requirement of the Specified End Use Plant (calculated in kcal on the basis the norms set out in Annexure VII)] minus [(annual energy requirement of the Specified End Use Plant met through any other existing coal linkage(s)(in kcal*)] plus (annual energy requirement of the Specified End Use Plant met through any captive coal mine(s) (in kcal) as per Clause 3.3.2) plus (annual energy requirement of the Specified End Use Plant met through any allocation of coal linkage(s) pursuant to auction process of any lot conducted by CIL and/ or by SCCL (in kcal))]$$

*Coal requirement of the Specified End Use Plant (in kcal) met through any other existing coal linkage(s) i.e. under New Coal Distribution Policy, shall be calculated on the basis of the annual contracted quantity under the existing linkage(s) wherein such annual contacted quantity shall be deemed to be of G10 grade of coal, irrespective of actual contracted grade.

- 3.3.2 Annual energy requirement of the Specified End Use Plant met through any captive coal mine(s):
- (a) Each Bidder who has been allocated captive coal mine(s) for its Specified End Use Plant(s), shall for each such captive coal mine, submit a self-certificate as per the format in ***Annexure XI***.
 - (b) If the mine opening permission has been granted by the Coal Controllers' Organisation (CCO), coal requirement of the Specified End Use Plant (in kcal) met through such captive coal mine(s) shall be considered in the manner prescribed below:
 - (i) Bidder shall submit the Scheduled Production for the 10 financial years commencing from the financial year in which this Scheme Document has been published, in accordance with Clause 3.3.2(a).
 - (ii) The Electronic Platform shall adjust the annual energy requirement of the Specified End Use Plant met through the captive coal mine(s) (in kcal). Such adjustment shall be corresponding to the minimum Scheduled Production as per the Scheduled Production the 10 financial years submitted by the Bidder in accordance with Clause (i) of 1.1.1(b) above.
 - (c) In case the mine opening permission has not been granted by CCO, then, the coal requirement met through the captive coal mine shall be considered as zero. Accordingly, the Electronic Platform shall adjust the annual energy requirement of the Specified End Use Plant met through the captive coal mine(s) (in kcal).
 - (i) In the event, mine opening permission has been granted post completion of Cement subsector Tranche VI Linkage auction, the Successful Bidder, shall simultaneous to the grant of mine opening permission by CCO submit the same to the relevant Subsidiary along with self-certificate as per format (A) of ***Annexure XI***. In case the Successful Bidder fails to submit the mine opening permission by CCO and/or self-certificate in accordance with this Clause, relevant coal company shall have right to terminate LOI and/ or the FSA, as the case may be, and forfeit the Bid Security or Performance Security as the case may be.
 - (d) In case of any modification in the Production Schedule of a captive coal mine by approval of competent authority during the subsistence of the Agreement, the same shall be notified simultaneously to the coal company by re-submitting the self-certificate at ***Annexure XI*** with the revised Production Schedule. Accordingly an amendment to the Agreement shall be executed to this effect. In case the production schedule is revised post completion of auction but prior to execution of the FSA, then, upon submission of the revised Production Schedule to the relevant coal company immediately post approval from the competent authority, the FSA shall be executed for the Allocated Quantity for the year computed based on the revised Production Schedule.
 - (e) Where a coal mine has been allocated for multiple plants, then the Normative Coal Requirement of the Specified End Use Plant shall be calculated after proportionately factoring the Scheduled Production from the said mine.

Illustration 1: The Specified End Use Plant (Kiln A) of the Bidder is a 36,50,000 tonnes per annum (“TPA”) Kiln with an existing linkage of 4,200 TPA. Also, a mine X of

G10 grade of coal has been allocated for captive consumption to the Kiln A and Kiln B whose annual coal requirement is in the ratio of 2:1.

- (d) The bidder unconditionally agrees all the actions taken/would be taken by coal companies/CIL with respect to their successful bids of previous tranche(s) of NRS Linkage auction, if any, relevant guidelines/conditions with respect to bids in earlier tranches of NRS Linkage auction and present tranche of auction.

3.5 Non-Discriminatory Ascending Clock Auction Process

- 3.5.1 The Coal Linkages shall be auctioned Lot wise as per the sequence and schedule set out in **Annexure VI**. In case the auction of Coal Linkages from any Lot spills over to the time of the next Lot(s), then the auction of such Lot(s) will be deferred and will be conducted at the end of auction of the Coal Linkages after the last Lot as per the auction sequence specified in **Annexure VI**. For example: There are 15 Lots (numbered L1 to L15) for a sub-sector with a proposed auction sequence of 3 Lots per day at 11:00 HRS, 14:00 HRS and 17:00 HRS respectively. In case the auction of the Coal Linkages from Lot 1 continues till 17:01 HRS on Day 1, auction of Coal Linkages from Lot 2 and Lot 3 will be deferred and will be conducted after the auction of the Coal Linkages from Lot 15.
- 3.5.2 The Coal Linkages shall be auctioned through a non-discriminatory ascending clock auction procedure in the following manner:
 - (a) The auction process for the Coal Linkages will be conducted in multiple rounds.
 - (b) The floor price for the auction in the first round of the auction process shall be the Modulated Price (“**Reserve Price**”) and the Bidders shall Bid for a particular Link Quantity in accordance with the provisions hereunder.
 - (c) In round 1 of the auction, the premium shall be Rs. zero/tonne against which the Bidders will be required to indicate their Link Quantity.
 - (d) At the end of each round of the Bidding with respect to a Coal Linkage, the demand/ supply ratio will be assessed by the Electronic Platform and the premium for the next round of auction will be determined based on the demand/ supply ratio of the immediately preceding round in the manner specified below, and in each

round of the auction, the Bidders may offer to purchase the Link Quantity against the Reserve Price plus premium for such round:

- (i) if demand/ supply ratio at the end of a particular round is greater than 100% (one hundred per cent.) and less than or equal to 125% (one hundred and twenty five per cent.), then the premium will be Rs. 25 (Indian Rupees Twenty Five) per tonne plus the premium of the previous round;
 - (ii) if demand/ supply ratio at the end of a particular round is greater than 125% (one hundred and twenty five per cent.) and less than or equal to 200% (two hundred per cent.), then the premium will be Rs. 50 (Indian Rupees Fifty) per tonne plus the premium of the previous round;
 - (iii) if demand/ supply ratio at the end of a particular round is greater than 200% (two hundred per cent.), then the premium will be Rs. 100 (Indian Rupees One Hundred) per tonne plus the premium of the previous round; and
- (e) Each Bid submitted by a Bidder during any of the auction rounds shall be considered a valid and binding offer to purchase the Link Quantity at the Reserve Price plus premium applicable for the relevant round.
- (f) The auction process shall stop when the demand/ supply ratio is less than or equal to 100% (one hundred per cent.) in a particular round. The round at which the auction stops (“**Last Round**”) and the penultimate round of the auction (“**Penultimate Round**”) will be compared and the quantity of coal to be allocated to each Bidder in each of the said rounds shall be computed as follows:
- (i) if the demand/ supply ratio in any of the above mentioned rounds is less than or equal to 100% (one hundred per cent.), each Bidder would be entitled to be allocated their full Link Quantity in that round; or
 - (ii) if the demand/ supply ratio in any of the above mentioned rounds is more than 100% (one hundred per cent.), then each Bidder would be entitled to be allocated their pro rata share of the Coal Linkage quantity in that round.

In the event that the entitlement of a Bidder pursuant to Clause 3.5.2(f)(ii) above, is not an integer multiple of the Transport Factor, such entitlement shall be decreased and rounded off (downwards) to the nearest integer multiple of the Transport Factor (such downward adjustment in the coal entitlement may hereinafter referred to as the “**Adjustment**”).

CIL shall, compute the actual coal entitlement of each Bidder for the Last Round and the Penultimate Round post the Adjustment, if any, and shall thereafter compare the expected revenue from the Last Round and the Penultimate Round.

The round generating the maximum revenue for CIL pursuant to the above computations and adjustments will be selected as the round for determination of the Successful Bidder(s) (“**Selected Round**”).

- (g) Each Bidder who has submitted Bids in the Selected Round shall hereinafter be referred to as a “**Successful Bidder**” and the quantity of coal to which the

Successful Bidder would be entitled to in the Selected Round (as computed under Clause 3.5.2(f)(i) or Clause 3.5.2(f)(ii) above) post Adjustment, if any, shall be referred to as the “**Allocated Quantity**”.

It is clarified that each Successful Bidder shall be entitled to receive only the Allocated Quantity and that the Allocated Quantity shall be used by the Successful Bidder only for consumption by the Specified End Use Plant. In the event that the actual loaded quantity of coal is lesser than the Allocated Quantity, such under-loading shall be dealt with in the manner specified in the Agreement.

An illustrative example is provided below for a Lot Size of 0.2 MTPA

Round	Demand/ Supply Ratio	Round Premium (Rs./Tonne)	
		Step up in Round Premium	Total Round Premium
1	324.00%	-	-
2	274.00%	100.00	100.00
3	204.00%	100.00	200.00
4	174.00%	100.00	300.00
5	150.00%	50.00	350.00
6	130.00%	50.00	400.00
7	126.00%	50.00	450.00
8	124.00%	50.00	500.00
9	122.00%	25.00	525.00
10	120.00%	25.00	550.00
11	106.00%	25.00	575.00
12	102.00%	25.00	600.00
13	102.00%	25.00	625.00
14	98.00%	25.00	650.00

Thus, the auction will stop at round 14 where the demand/supply ratio falls below 100% (one hundred per cent.). At this stage, The system will compare the expected revenue from round 14 (i.e. the Last Round) and round 13 (i.e. the Penultimate Round). The round generating the maximum revenue will be selected. For calculating the revenue generated from the aforesaid rounds where demand supply ratio is greater than 100% (i.e. round 13 in this example), the final Allocated Quantity, after factoring in the rounding off due to Transport Factor limitations will be considered. An illustrative example is worked out for rail mode of dispatch below:

Allocation and revenue Calculations for Round 13			
Description	Bidder 1	Bidder 2	Bidder 3
Link Quantity (TPA)	52,900	47,100	1,04,000
Pro-rata allocated quantity (TPA)	51,863	46,176	1,01,961
Final Allocated Quantity post Adjustment (TPA)	51,800	46,100	1,01,900

Total Quantity Available for Sale	1,99,800 TPA
Reserve Price (assuming G8 grade) (tentative for the purpose of illustration only)	Rs. 1,767 per tonne
Applicable Round Premium	Rs. 625 per tonne
Total Applicable Price	Rs. 2,392 per tonne
Total Revenue	Rs. 47.79 Crore

Allocation and revenue Calculations for Round 14			
Description	Bidder 1	Bidder 2	Bidder 3
Link Quantity (TPA)	48,700	45,300	102,000
Final Allocated Quantity (TPA)	48,700	45,300	102,000
Total Quantity Available for Sale	1,96,000 TPA		
Reserve Price (assuming G8 grade)(tentative for the purpose of illustration only)	Rs. 1,767 per tonne		
Applicable Round Premium	Rs. 650 per tonne		
Total Applicable Price	Rs. 2,417 per tonne		
Total Revenue	Rs. 47.37 Crore		

Since revenue under Round 13 is more than under Round 14, CIL may choose this Round and allocate each Bidder their pro-rata share with a premium of Rs. 625 per tonne

- (h) In case demand/ supply ratio is 100% (one hundred per cent.) or less in round 1 of the auction, each Bidder shall be allocated their Link Quantity for that round at the Reserve Price.
- (i) The Bidders will have to abide by the following conditions in each round of the auction:
 - (i) for road mode of dispatch, the Link Quantity shall be equal or greater than 100 TPA and shall neither exceed the Normative Coal Requirement nor the quantity offered in a particular Lot. For rail mode of dispatch, the Link Quantity shall be equal or greater than 4000 TPA and shall neither exceed the Normative Coal Requirement nor the quantity offered in a particular Lot;
 - (ii) the Link Quantity will be integer multiple of 100 TPA (hereinafter referred to as the “**Transport Factor**”); and
 - (iii) the Link Quantity in a particular round shall be lower than or equal to the Link Quantity quoted in the previous round.
 - (iv) **Coal Requirement as entered on the auction platform for Bidders who have participated in earlier tranches:**

For Bidders who have participated in earlier tranches of auction of coal linkages to the Cement sub-sector, the auction platform currently does not permit any modification in the value submitted under Coal Requirement. For such cases, three categories of Bidders can be considered:

- (a) First time Bidders.
- (b) Bidders who have Bid in earlier Tranche(s) and won a quantity equal to their Normative Coal Requirement, and are therefore ineligible to Bid.
- (c) Bidders who have bid in earlier Tranche(s) and still have some Normative Coal Requirement left over against which they can bid.

For case (a), Bidders have to enter fresh information. Bidders under case (b) are ineligible to bid. For case (c): the Bidder may bid up to the balance Normative Coal Requirement as displayed on the auction platform. The Deficit Percentage calculated for earlier tranche(s), as applicable, will be applied to calculate the Allocated Quantity in the current tranche.

Example:

The Bidder has the following allocation (G10 equivalent quantities) in Tranche I/ Tranche II/Tranche III/Tranche IV/ Tranche V:

		(tonnes)
Coal Requirement specified by the Bidder	(A)	1,20,000
Verification Certificate obtained for	(B)	1,02,000
Existing Linkage under NCDP	(C)	20,000
Normative Coal Requirement	$D = A - C$	1,00,000
Provisional Allocated Quantity in Tranche I / Tranche II/Tranche III/Tranche IV/Tranche V	(E)	50,000
Deficit Percentage	$F = (A - B)/D$ $*100 \%$	18%
Allocated Quantity	$G = E - (E * F)$	41,000

The following is an example for Cement sub-sector Tranche VI Coal Linkage Auction for a case where the Bidder has bid for and was allocated the entire balance quantity as permitted by the auction platform:

		(tonnes)
Normative Coal Requirement (For Tranche VI)	$H = D - E$	50,000
Provisional Allocated Quantity	(I)	50,000
Allocated Quantity	$J = I - (I * F)$	41,000

The following is an example where either the Bidder has chosen to bid for or has been allocated a quantity which is lesser than his balance requirement as permitted by the auction platform

		(tonnes)
Normative Coal Requirement (For Tranche VI)	$K = D - E$	50,000
Provisional Allocated Quantity	(L)	10,000
Allocated Quantity	$M = L - (L * F)$	8,200

(j) In the event that any coal remains unallocated pursuant to completion of the Cement subsector Tranche VI coal linkage auction , CIL reserves the right to dispose of such coal in the Tranche VI Coal Linkage Auction and/ or the subsequent tranche of auction for the non-regulated sector conducted by CIL.

(k) **Allocated Quantity for the year on the basis of Scheduled Production**

(i) Each Successful Bidder shall be entitled to the Allocated Quantity for the year post adjustment of the Scheduled Production (year-on-year) submitted by such Successful Bidder as part of **Annexure XI**. The adjustment with respect to the year-on-year Scheduled Production shall be Lot-specific and on the basis of the annual energy requirement of the Specified End Use Plant met through the Scheduled Production for the year. The Allocated Quantity for each year for a particular Lot under Cement sub—sector Tranche VI coal linkage auction shall be computed in accordance with the following formula:

$$\text{Allocated Quantity for the year} = \frac{\text{(Adjustment Factor x Energy Requirement for the year)}}{[(10^9) \text{ multiplied by (the average gross calorific value of the grade of coal of the Lot as specified in Annexure VII)]}$$

Wherein,

Adjustment Factor =

$$\frac{\text{energy requirement of Specified End Use Plant met from a particular Lot}}{\text{Total energy requirement of Specified End Use Plant met from Cement subsector Tranche VI Linkage Auction under Tranche V}}$$

Energy Requirement for the year =

(Normative Energy Requirement of the Specified End Use Plant for Cement sub—sector Tranche VI coal linkage auction + energy requirement of the Specified End Use Plant corresponding to the minimum of the Scheduled Production – energy requirement of the Specified End Use Plant corresponding to the Scheduled Production of the year)

(ii) Adjustment in the Allocated Quantity for the year shall be carried out in case the Energy Requirement for the year as computed above is less than the total energy requirement booked for the Specified End Use Plant during the Cement sub—sector Tranche VI coal linkage auction. Provided however, in the event the energy requirement of the Specified End Use Plant for the year as computed above is less than 0, then Allocated Quantity for that year shall be 0.

(iii) In the event the energy requirement for the year is equal to or more than the total energy requirement of the Specified End Use Plant met from Cement sub—sector Tranche VI coal linkage auction there shall be no adjustment in the Allocated Quantity for the year.

Illustration

For example, If the Normative Energy Requirement of the Bidder corresponding to its

Specified End Use Plant for the particular auction under concerned Tranche VI is 1,10,75,00,00,000 kcal/annum and the Bidder had a captive coal mine with minimum production of 10000 tonnes with G11 grade (i.e. the energy requirement of the Specified End Use Plant corresponding to the minimum of the Scheduled Production is 41,50,00,00,000 kcal/annum viz. 10000 tonnes multiplied by the average GCV of G10 grade, which is 4150 kcal/kg). Suppose the Scheduled Production for a particular year is 15000 tonnes i.e. energy requirement of the Specified End Use Plant corresponding to the Scheduled Production of the year is 62,25,00,00,000 kcal/annum. The Energy Requirement for the Year shall be 90,00,00,00,000 kcal/annum (i.e. 1,10,75,00,00,000 kcal/annum + 41,50,00,00,000 kcal/annum - 62,25,00,00,000 kcal/annum).

Assume the total quantity booked by the Bidder in the auction is 20000 tonnes in G10 grade which corresponds to 89,00,00,00,000 kcal/annum in energy terms, there shall be no adjustment in the quantity allocated to the Bidder (as the Energy Requirement of the Year viz. 90,00,00,00,000 kcal/annum is more than total energy requirement booked for the Specified End Use Plant during the relevant subsector Auction under the particular tranche viz. 89,00,00,00,000 kcal/annum).

In case the energy requirement of the Bidder for a particular year after adjustment to the production from the captive coal mine for that year is 80,00,00,00,000 kcal/annum instead of 90,00,00,00,000 kcal/annum, then there will be adjustment in the Allocated Quantity of the Year and the quantity allocated to the Bidder shall be revised from 20000 to 17977 tonnes i.e. 80,00,00,00,000 kcal divided by the average GCV of G10 grade, which is 4450 kcal/kg

- (iv) In the event that the Allocated Quantity for the year pursuant to this Clause, is not an integer multiple of the Transport Factor, such Allocated Quantity shall be decreased and rounded off (downwards) to the nearest integer multiple of the Transport Factor.
- (v) In the event the mine opening permission is received subsequent to completion of Cement sub—sector Tranche VI coal linkage auction, the Allocated Quantity for the remaining period of the Agreement shall be computed in the manner prescribed above, based on the Scheduled Production submitted by the Successful Bidder to the coal company, as per format at Annexure XI, immediately on receipt of such information from the Successful Bidder. An amendment to the Agreement shall be executed between the Successful Bidder and the coal company to this effect.

Illustration 1: The Specified End Use Plant (Kiln) of the Bidder is a 1.2 million tonne per year unit based on Wet process. The Bidder has an existing FSA with an ACQ of 15000 tonnes in G10 equivalent. Further, a mine of G13 grade of coal has been allocated for captive consumption to the kiln, and mine opening permission has been granted by CCO on July 16, 2018. SEUP – Specified End Use Plant

As may be seen from the table above, adjustment in the allotted quantity was done from Year 5 onwards i.e. from the year where the Energy Requirement of the Year of the EUP is less than the Normative Energy Requirement computed at the commencement of the auction basis which the Bidder had been declared successful for certain quantity

Illustration 2: The Specified End Use Plant (Kiln) of the Bidder is a 2 million tonne per year unit based on Dry process. The Bidder has an existing FSA with an ACQ of 1,00,000 tonnes in G10 equivalent. Further, a mine of G13 grade of coal has been allocated for captive consumption to the kiln, Assuming that the Bidder with the Specified End Use Plant as above does not have a mine opening permission at the time of participation in the auction. The Normative Energy Requirement of the Specified End Use Plant (Kcal per annum) is as per the table below:

3.9 Periodic Payments by the Successful Bidder

The price to be paid by the Purchaser with respect to the Contracted Grade of Coal delivered shall be computed on the basis of the following:

(A) Indexation of supply price for NRS linkage auction-

- Wholesale Price Index (WPI) will be used for indexing of the basic price of NRS Linkage auction by applying on prevailing Modulated Price as on 31st March of the year (for the first year of indexing i.e. on 1st April 2023, WPI will be applicable on Notified Price to arrive Modulated Price). Indexation of basic price may be done to the extent of 25% (1/4th) of the movement of WPI.
- The change in price with WPI (Indexed Price) over previous year shall have an cap of +5%/-2.5% at the upper end and lower end.
- The Modulated Price, applicable for supply, shall be the Indexed Price or the prevailing notified price for NRS consumers, whichever is higher. In case of revision in Notified Price anytime during the year, the new Modulated Price shall be arrived by taking the Notified price or the prevailing Modulated Price, whichever is higher. The new Modulated Price will be effective from the date of such revision. The Modulated Price, so arrived, will be rounded off to the next higher integer.
- The Modulated Price will be calculated on the basis of movement of final WPI index of December every year vis a vis December last year and will be made effective from 1st of April of the following year, starting from 1st April 2023.
- The Winning Premium fetched at the time of auction (over Reserve Price) will remain constant and shall be applicable as a percentage over the Modulated Price.

- In case there is change in Modulated Price during the course of auction of a subsector, either due to change in notified price or application of new Modulated Price(in April), the ongoing auction will continue with the earlier modulated price. However, during actual supply, the new Modulated Price will be applicable.
- In case of upward revision of price(Modulated Price), the additional performance security (covering 6% of ACQ) shall have to be deposited by the bidder to coal company within 30 days of such revision.
- CIL reserves the right to change/amend/modify the above mentioned indexation methodology/parameters and the same shall be binding on Seller and Purchaser for all commercial and operational provisions under this agreement.

As Delivered Price of Coal: In addition to the payments specified in this Scheme Document, the Successful Bidder shall be required to make periodic payments for the coal supplied under the Agreement on the basis of the following formula:
[(aggregate of the Modulated Price and (the Winning Premium multiplied by the Modulated Price) multiplied by (the Allocated Quantity supplied under the Agreement)].

An illustration with respect to the computations envisaged above in Clause 3.9 is provided below:

- Notified price on 01.04.2023= N1
- The indexed price calculated on the basis of Dec'22(vis a vis Dec'21) WPI = W1
- Modulated Price(Y) w.e.f 01.04.2023 will be the higher of W1 & N1
- (Say) Notified price revised w.e.f. 01.10.2023= N2
- Modulated Price(Z) w.e.f 01.10.2023 will be the higher of Y & N2
- The modulation of price (higher of WPI & notified price from 01.04.2024) will be on the basis of Z.
- Basic Coal supply price from 01.04.2024= Z+(Z x % premium)

Reserve Price(Notified Price as on 31.01.2023) of auction (Rs./tonne)	2000
Premium (Rs./tonne)	400
Bid Price of the Successful Bidder (Rs./tonne)	2400
% Premium over Reserve Price (to remain constant)	20%

Indexation of price with WPI	
Change in WPI for Dec'22 vis a vis Dec'21	14%
Applicable percentage of WPI for coal price indexing(say 25%)	3.5%
Indexed price	2070
Notified price as on 01.04.2023	2000
Modulated price applicable for supply from 01.04.2023	2070
Premium(20% of Modulated Price)	414
Basic coal supply price	2484

(B) Indexation of Cost Plus source for NRS linkage auction

- The supply price(based on Modulated Price) of cost plus source shall be fixed by WCL using applicable indexation mechanism for the source. The price shall be notified by WCL at periodic intervals as per the indexation mechanism of respective cost plus mine as notified.
- The Modulated Price, applicable for supply, shall be calculated based on Indexed Price of Cost Plus Mine applicable for NRS Linkage auction consumers.
- The Winning Premium fetched at the time of auction (over Reserve/Floor Price) will remain constant and shall be applicable as a percentage over the Modulated Price, applicable at the time of supply of coal.
- CIL/WCL reserves the right to change/amend/modify the above mentioned indexation methodology/parameters and the same shall be binding on Seller and Purchaser for all commercial and operational provisions under this agreement.
- As Delivered Price of Coal = [aggregate of the Modulated Price based on cost plus source specific price notified by WCL) and (the Winning Premium(%) multiplied by Modulated Price)] multiplied by [the relevant quantity of the Contracted Grade of Coal supplied].
- The As Delivered Price of Coal computed pursuant to the above shall exclude sizing charges, transportation charges up to the Delivery Point, rapid loading charges, statutory charges, levies and other charges as may be applicable from time to time, which shall be additionally payable by the Purchaser.

It must be noted that Kilns i.e. Clinker manufacturing units located within the same plant boundary are allowed to be registered as one Specified End Use Plant. However, once the units are combined and registered as single Specified End Use Plant, they cannot be split subsequently.

(i) Details of Specified End Use Plant

- (a) Bidders who have submitted RFP Information earlier for their respective Specified End Use Plant.

As Bidders who have submitted RFP Information earlier for the respective Specified End Use Plant (under any previous Tranche of CIL and/or SCCL),
have already provided details pertaining to their existing fuel supply

agreements as on a specific cut-off date ("**Cut-Off Date**"), such Bidders shall only be required to provide the following details:

A. FSA Details

Details of the annual contracted quantity of fuel supply agreements that (1) have expired post the Cut-Off Date corresponding to the most recent Tranche of auction in which they had participated and (2) will expire by the Cut-Off Date for Tranche VI i.e. March 31, 2023. It is clarified that only details of fuel supply agreements under The New Coal Distribution Policy shall be considered for this purpose.

The energy value in kCal of such expired quantity of coal, deemed at G10 grade, will be added to the presently calculated/displayed Normative Energy Requirement of the Specified End Use Plant on the Electronic Platform. Thus, such Bidders will become eligible to participate for a new Normative Energy Requirement, which will be the sum total of the presently calculated/displayed Normative Energy Requirement and the Normative Energy Requirement arising from the lapsed fuel supply agreement quantity as mentioned above.

In case more than one fuel supply agreement has expired/ shall expire during the above mentioned period between the Cut-Off Date for the most recent Tranche of auction in which the Bidder had participated and the Cut-Off Date for Tranche VI i.e. March 31, 2023, the Bidder should mention about the expired quantity date wise separately for each lapsed fuel supply agreement.

B. Details of the Scheduled Production as per the Self-certificate submitted by the Bidder in accordance with Clause 3.3.2

The responsibility of submitting correct information lies entirely with the Bidder. If it is found at any later stage that the Bidder has submitted false/ incorrect information either intentionally or inadvertently, action as per the provisions of this Scheme Document will be taken against such Bidder.

(b) Bidders who are submitting RFP Information for the first time for the respective Specified End Use Plant.

Bidders who are submitting RFP Information for the first time for the respective Specified End Use Plant (i.e. Bidders who have not submitted information pertaining to the Conditions to Auction for the respective Specified End Use Plant under Tranche I-V of CIL and/or SCCL) are required to submit information about the capacity of the Specified End Use Plant (in Tonnes Per Annum i.e. TPA) for which Coal Linkage is being sought along with the annual contracted quantity (in tonnes) of coal available to them through existing coal linkage(s) and the Scheduled Production as per the self-certificate submitted by the Bidder in accordance with Clause 3.3.2 (in tonnes) and grade of coal available to them from their captive coal mine(s). This is a pre-requisite for participating in the Non-Discriminatory Ascending Clock Auction Process. The responsibility of submitting correct information lies entirely with the Bidder. If it is found at any later stage that the Bidder has submitted false/ incorrect information either intentionally or inadvertently, action as per the provisions of this Scheme Document will be taken against such Bidder.

It is clarified that for the purposes of providing information about the capacity of the Specified End Use Plants, such Bidders shall enter the fuel supply agreement quantities for only those fuel supply agreements that shall be valid and subsisting after March 31, 2023, the Cut Off date.. Further, only details of fuel supply agreements under The New Coal Distribution Policy shall be considered for this purpose.

Based on the capacity of the Specified End Use Plant, the Electronic Platform shall calculate the annual requirement of coal in G10 equivalent grade and display the

same on screen. It is clarified that where a Bidder has specified one or more Kilns (in a single location within the same boundary) as the Specified End Use Plant, the Normative Coal Requirement shall be assessed on the basis of configuration of each such individual Kilns based on the consumption norms. The Electronic Platform shall also display the balance energy requirement of the Specified End Use Plant in kcal and also the maximum quantity of coal of each grade from G1 to G14 for which the Bidder shall be eligible to bid.

Bidders should note that utmost care should be taken to submit the above information.

(ii) Payment towards Bid Security and Process Fee (EMD)

CIL and/ or MSTC shall not be responsible if the identity of the remitter of the payment can't be established correctly and for any subsequent loss to any Bidder.

Calculation of Bid Security and Process Fee:

If a Bidder wishes to bid for Q (tonne) quantity of coal for a Specified End Use Plant, then it must have a balance EMD (Bid Security plus Process Fee) of Rs. 120Q before the start of the auction. The Bid Floor will also display the start time of e-auction, the number of the auction round, the premium for

the auction round, the offered quantity of coal per annum, the grade and other details of offered coal etc. The Bidder shall quote its required quantity of coal per annum (Link Quantity) in the space provided for the same and click on the BID button. The Bidder shall have to sign the bid that it intends to submit with its registered Digital Signature Certificate (DSC). The Link Quantity should be less than or equal to the maximum quantity of coal that the Bidder can bid for the particular grade of coal and the balance EMD of the Bidder should be sufficient for the quantity quoted.

The first round of auction will be of 15 mins followed by subsequent round(s) of 8 mins each. There will be no time gap between two consecutive auction rounds for the same Lot. The Bidder shall have to submit its Bid within the stipulated time of any auction round. No representation/ complaint stating the misuse/ unauthorized usage of login id and password will be entertained at any stage.

Bidders may further note that bidding in subsequent auction rounds is allowed only for such bidders who have quoted a non-zero quantity in the immediately preceding auction round. A Bidder is not allowed to increase its Link Quantity in subsequent auction rounds but can quote the same or less Link Quantity in the subsequent auction rounds. Hence, in their own interest, Bidders may quote their desired maximum quantity (subject to EMD and maximum permissible quantity) in the first auction round itself.
